#### **4. NPS ARCHITECTURE:**

In NPS architecture, each function is performed by different entities.

- a. Pension Fund Regulatory and Development Authority [PFRDA] is the regulator for the NPS. They are responsible for appointment of various intermediaries in the system, such as Central Record Keeping Agency [CRA], NPS Trust, Trustee Bank, Pension Fund Managers, Custodians, Points of Presence (POP) and monitor their performance.
- b. Central Record keeping lies with NSDL. As CRA, its functions include record keeping, administration and customer service functions, issue of Permanent Retirement Account Number [PRAN] to each subscriber and maintain a database of all PRANs issued and recording transactions relating to each subscriber's PRAN. They also act as an operational interface between PFRDA and other NPS intermediaries.
- c. The NPS Trust established by PFRDA is administered by the Board of Trustees as constituted by PFRDA. This Trust would be responsible for taking care of the funds under the NPS. The Trust would hold an account with a bank and this bank would be designated as NPS Trustee Bank. Presently, Bank of India is functioning as Trustee Bank.
- d. Funds are managed by six Fund Managers from Public and Private sector with proven track record.
- e. Stock Holding Corporation of India Ltd., functions as custodian for NPS.
- f. Points-Of-Presence [POP] are the first point of interaction between the subscriber and the NPS architecture. They perform the functions relating to registration of subscribers, undertaking Know Your Customer [KYC] verification, receiving contributions and instructions from subscribers/corporate and transmission of the same to designated NPS intermediaries. Banks can also get themselves registered as POP.
